In the groundwater monitoring table, it lists MW-10 twice. Once for semi-annually and once for annually. Also, monitoring well MW-4 is not included in the table.

Answer: MW-10 is to be sampled **semi**-annually instead of annually. Monitoring well MW-4 has been abandoned and no longer in use and therefore not part of the sampling protocol.

In addition piezometer PZ-16 was mislabeled in the table as MW-16. See table below for sampling regimen.

Well	Quarterly	Semi-Annually	Annually
MW6, MW7, MW14, potable well	X		
MW2, MW3, MW5, MW8, MW9, MW10, MW12, MW13, PZ-16		X	
MW1, MW11, MW15, potable well (see below)			X

Question: Are we to include all workscope costs in our bid total and assume that only 30% will be eligible /*OR*/ only include 30% of the workscope costs in our bid total

Answer: Include all workscope costs in the bid response. Final determination of eligible vs. ineligible costs will be made during claim review.
